Professional Summary

Full-Stack Developer Intern and final-year NDT IT student at the University of Moratuwa. Specializes in building scalable web applications using modern frameworks (Laravel, React, Next.js) and robust database architectures. Passionate about applying problem-solving skills to complex backend logic and integrating Machine Learning concepts to drive innovative technical solutions.

Technical Skills

Languages:	PHP, JavaScript, TypeScript, Python, Java, HTML5, CSS3
Frameworks & Libs:	Laravel, React.js, Next.js, Express.js, Node.js, Tailwind CSS
CMS & Platforms:	WordPress
Databases & Cloud:	MySQL, MongoDB, PostgreSQL, Supabase, TiDB, Vercel, Railway
DevOps & Tools:	Git, GitHub, Prisma ORM, VS Code
Core Competencies:	OOP, RESTful APIs, Data Structures & Algorithms, Agile Development

Work Experience

Axcertro (Pvt) Ltd <i>Full Stack Developer Intern</i>	Sri Lanka 2026 – Present
- Collaborating on the development and optimization of enterprise-level web applications using modern full-stack architectures. - Designing and implementing responsive, user-centric frontends paired with robust, scalable backend APIs. - Participating actively in daily stand-ups and sprint planning within an Agile development framework. - Utilizing Git and GitHub for streamlined version control, code reviews, and collaborative workflows. - Engaging in testing, debugging, and continuous deployment tracking to ensure software quality and reliability.	

Key Projects

Riyahala.lk – <i>Vehicle Marketplace Platform</i> riyahala-vehicle-marketplace-production.up.railway.app	2026
- Developed a full-stack vehicle marketplace platform enabling users to list, browse, and search for vehicles seamlessly. - Implemented reliable backend features and responsive layouts optimized for efficient vehicle trading using modern ORM and database management. Tech Stack: Next.js, Prisma, TiDB (SQL), Railway (Deployment)	
Woolbear.lk – <i>Full-Stack E-Commerce Platform</i>	2026
- Engineered a high-performance e-commerce marketplace featuring secure user authentication and order tracking workflows. - Developed an intuitive admin dashboard enabling real-time product management and inventory tracking. - Integrated a seamless backend architecture utilizing Next.js, TypeScript, and Supabase cloud database services. Tech Stack: Next.js, TypeScript, Tailwind CSS, Supabase	
HelaHarvest.lk – <i>Farm-to-Consumer E-Commerce Platform</i>	2025 – Present
- Building a direct-to-consumer digital marketplace aimed at streamlining agricultural distribution channels. - Implementing real-time crop status updates and dynamic inventory management modules for local farmers. Tech Stack: React.js, Laravel, Inertia.js, MySQL, Tailwind CSS	
JustPark.lk – <i>Cloud-Based Parking Reservation System</i>	2024 – Present
- Designing a web platform for smart parking allocation featuring real-time availability tracking. - Developing location-aware search features alongside a secure space reservation and booking system. Tech Stack: React.js, Node.js, Express.js, MySQL	

- Developed an automated license plate recognition system using state-of-the-art object detection algorithms.
- Integrated dual-mode tracking supporting both static image uploads and live webcam video streams.
- **Tech Stack:** Python, OpenCV, YOLO, Tesseract OCR, Flask

Education

Institute of Technology, University of Moratuwa

2024 – Present

National Diploma in Technology (NDT) in Information Technology

- Core Modules: Software Engineering, Database Management Systems, Web Architecture, Data Structures.

St. Thomas’ College, Matara

2019 – 2021

G.C.E. Advanced Level (Physical Science Stream)

- Results: 2B, 1C — Z-Score: 1.26

Certifications & Key Attributes

- **Certification:** Python for Beginners (2024) – Focused on programming paradigms and algorithmic problem-solving.
- **Soft Skills:** Adaptable fast learner, clear technical communicator, and proactive team player in agile setups.
- **Quality Focus:** Dedicated to writing clean, maintainable code with thorough documentation.
